CAREER OBJECTIVE

Junior MERN Stack Developer with hands-on experience in building full-stack applications. Proficient in React, Node.js, Express, and MongoDB, I enjoy solving problems, writing clean code, and creating responsive user interfaces. I am seeking an opportunity to contribute to real projects, grow professionally, and collaborate effectively within a team.

SKILLS

Frontend: JavaScript | ES6 | React js | Tailwind | HTML5 | CSS3 | TanStack Query
Backend: Node.js | Express.js | MongoDB | Firebase Auth | JWT
Tools & Platforms: Git | GitHub | VS Code | npm | Netlify | Vercel | Surge
Soft Skills: Problem Solving | Quick Learning | Time Management | Communication | Teamwork | Collaboration

PROJECT

ProShift -Parcel Delivery & Rider Management System   Live site | Client code | Server code

A full-stack platform for managing parcel deliveries across all 64 districts. Users can create delivery requests, track parcels in real time and make online payments. Riders get tools to accept orders, update status and track earnings. Admin dashboard manages users, riders, parcels, payments and cashout requests..

Key Features:

- Role-based dashboards for Admin, Rider and User   ● Real-time parcel tracking and status updates
- Online payment support and earnings management ● Secure authentication using Firebase + JWT
- Full admin control panel for user, rider and parcel management

  React | React Router | Tailwind CSS | Firebase Auth | Node.js | Express.js | MongoDB | JWT | Stripe Payment

CareerLink – Freelancing Marketplace   Live site | Client code | Server code

A freelancing platform where clients post jobs and freelancers submit bids. Includes real-time updates for bids, personalized dashboards and secure authentication. Helps users manage projects, applications, bid history and profiles from one place.

Key Features:

- Job posting and bid system ● Secure authentication+protected routes ● Project and application management
- Real-time data with TanStack Query ● User dashboards for clients and freelancers

  React | React Router | Tailwind CSS | Firebase Auth | Node.js | Express.js | MongoDB | JWT

TaskHive – Micro Task Posting Platform   Live site | Client code | Server code

A lightweight task marketplace where users post small online tasks and hire helpers. Taskers browse tasks, submit work and manage activity. Posters handle approvals, edits and updates through a simple dashboard.

Key Features:

- Task posting and submission workflow ● Dashboards for posters and taskers
- CRUD operations for tasks and submissions ● Secure login and route protection
- Secure authentication using Firebase + JWT

  React | React Router | Tailwind CSS | Firebase Auth | Node.js | Express.js | MongoDB | JWT
